

3 TIER RECOMMENDED DRUG LIST
BRAND NAME DRUGS WITH GENERICS AVAILABLE ARE ITALICIZED AND LISTED FOR REFERENCE ONLY

The 3-Tier Recommended Drug List (RDL) has been designed to provide Health Net members with information about medications, their copayment tier, and alternative medications within a therapeutic class. Medications on tier one or two are available at the lowest level copayment. Brand name medications are listed in CAPITAL LETTERS. If the medication name is **ITALICIZED** only the generic will be covered. The brand name is listed for reference only and ease of identification. Generic drugs are listed in lower case.

The first section of the Recommendation Drug List is an alphabetized list of brand and generic drugs and their corresponding copayment Tier. The second section is arranged by therapeutic class. The available medications are listed by copayment tier. Selecting a generic medication within a therapeutic class or at a lower tier will save you money.

The (PA) indicator means prior authorization (pre-approval) is required before the medication is covered. Review the RDL to see if a medication requires a prior authorization. A (QL) means that there are quantity or duration limits. Doses or duration beyond the standard will require prior authorization. Review the Recommended Drug List (RDL) to see if there are any restrictions or limitations regarding dose or duration for a particular medication. An (EST) means that there is an Electronic Step Therapy or a pre-requisite drug required for coverage. If the pre-requisite drug has been used the claim will process automatically. The Recommended Drug List is subject to change at anytime. Generic availability can change due to market and regulatory conditions. (LD) means the drug has limited availability and must be obtained through a participating Specialty Pharmacy. Check with Customer Service to identify the Pharmacy to be used. (N) means the drug is not available through the mail order benefit as the drug is not carried by the mail order vendor.

The Specialty Drug List applies to Members that have a "Specialty Drug Tier" under their pharmacy benefit. Members need to check their Plan documents for their benefits. Drugs indicated with a (SP) are required to be obtained from a Health Net Specialty Pharmacy and are not available through Mail Order.
